

About Us

We are a young, enthusiastic company established in 2007 with the aim of becoming a "One-Stop Shop" for IT supplies and services. Since our inception, our objective has always been to offer our clients a single point of reference for all their Information Technology needs.

Besides the traditional IT products and services, today at Infotech we specialise in Point of Sale systems including Fiscal Cash Registers, as well as Security Systems for both residential and commercial premises.

With our vast experience, we offer peace of mind, along with innovative, reliable and reputable software and hardware, always backed by our exceptional after-sales service.

We provide a free visit on site along with a free quotation!

DELIVERY

Businesses need to become creative in how they offer their products to customers to adapt and evolve, not just to survive throughout the pandemic but also to develop new opportunities. Aera Delivery helps both catering and retail stores to manage a delivery and takeaway service, and offers a complete software solution that is simple and intuitive to use.

Aera Delivery is the software running on the POS or computer where orders are inputted and scheduled, both to be delivered or for the customer to pick up.

Using Aera Delivery, you can:

- Take an order and schedule the collection or delivery time, or
- Automatically receive orders from the Aera Delivery App
- Print orders automatically when scheduled
- Organise the deliveries going out with couriers
- Manage the incoming payments from the couriers

Simple and intuitive

The Aera Customer App is an app that we publish for you and which your customers can download and install on their mobile devices. From this app, your customers can send their order which is received directly in your POS system.

It is a personalised app for your business, and therefore your customers will find only the items that you want to offer. There are no other competing stores, and no commissions to be paid. Customers can choose to pay via credit card (and funds go directly to your bank account) or cash on delivery.

When used at the Restaurant, the app also provides a digital menu to the customer sitting at the table (to avoid handling of traditional paper menus between customers). It also allows the customer to send the order directly from the table and avoid staff interaction as much as possible.
